

# Practical No : 05

Name **DATTARAJ SUBHASH VAGARE**

Batch: **H1 819**

Prn: **202201050037**

**Q.** Select any one real-life dataset. Develop an interactive dashboard using the matplotlib/Seaborn library. (Use any 10 different graphs with proper titles, legends, axis names, etc. to map identified grains) Select any one real-life dataset. Perform data analysis. Identify 10 grains for a given

## Code:

```
import matplotlib.pyplot as plt
import numpy as np
import pandas as pd
df=pd.read_csv('testmarks1.csv')
print(df)
```

```
